

Online Knowledge Management Sessions:

**Effluent Treatment- Design,
Operations & Maintenance
Resource optimisation**

- ✓ **Greenfield ETP/ Upgradation (design/ technology selection)**
- ✓ **ETP start-up/operation & maintenance issues**
- ✓ **Water Resource Management**
- ✓ **Management of sludges and residues**

Our conscious approach

STEP introduces online consultation in the portfolio for assisting clients in knowledge management, audits, assessment & reviews.

ETP/ Wastewater Treatment Plants Design, Operation and maintenance

Composition of every wastewater is different and therefore design of treatment flow scheme needs to be specific. STEP provides a platform for evaluation of different technologies and equipment available in the market so that a holistic treatment flow scheme could be developed. Online consultation on ETP Operation & Maintenance.

Resource Optimisation & Waste Minimisation

Water and wastewater audit, Mapping water consumption, wastewater streams, intervention for waste minimisation, process intensification/ optimisation and productivity improvements through resource minimisation.

Knowledge Management & Capability Development

Online training sessions for EHS employees and operators on wastewater treatment fundamentals, design basis, operations & maintenance, troubleshooting etc. .
